

Surveillance Technologies

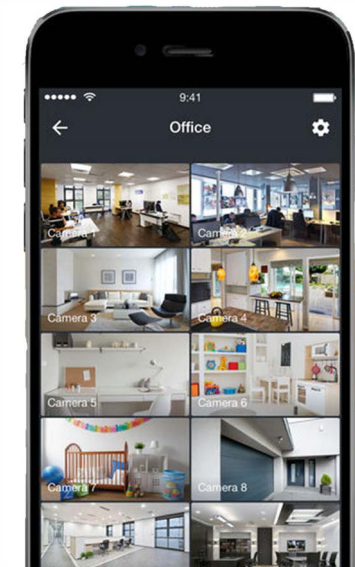

# We can protect Your Assets

Be two places at one time using surveillance technology and cameras. Using NVR and DVR devices, you can record, monitor, and receive alerts from analog and IP based cameras. Surveillance cameras provide security and the ability to monitor an environment 24 hours a day in varying light conditions and can even inform you of specific events or occurrences.

## Services:

- Real Time Monitoring & Alerts
- Document Accidents & Incidents
- Monitor Employee Productivity
- Day & Night Surveillance Capabilities
